Overview

Working with headings

Adding paragraphs

Styling text

Adding images

Working with Headings

Headings are used to create sections in our HTML content

Headings

6 Different Headings Are Included

index.html

```
<h1>Heading 1</h1>
```

```
<h2>Heading 2</h2>
```

```
<h3>Heading 3</h3>
```

```
<h4>Heading 4</h4>
```

```
<h5>Heading 5</h5>
```

```
<h6>Heading 6</h6>
```

Heading 1

Heading 2

Heading 3

Heading 4

Heading 5

Heading 6

HTML Headings

Only use a single `<h1>` on a page

Important for accessibility

Demo

Creating headings

Exploring the headings in the browser

Creating Paragraphs

<p>

For many years, Bethany has been baking the most delicious pies at her home.

In 2013, we opened our first store.

</p>

Creating a Paragraph

<p>

For many years, Bethany has been baking the most delicious pies at her home.

In 2013, we opened our first store.

</p>

Adding a Line Break

**
 is a empty tag**

Just ignore it!

The browser doesn't use spaces,
line breaks, or tabs you use
in your HTML

Demo

Adding content

Styling Text

b and i

For many years, **Bethany** has been baking the most delicious pies at her home. In 2013, we opened our first store in *Brussels (Belgium)* in a cosy little street near the Grand Market.

<var>

Styling Paragraphs

```
<p align="center">  
  <h2 align="left">Our history</h2>  
</p>
```

Using Styles

Styles are the way to go to add style attributes

Can be done in several ways

```
<h1 style="font-size:40px;color:#a593c2">Welcome to Bethany's Pie Shop</h1>
```

Using the Style Attribute

Using the <style> Tag

index.html

```
<head>
```

```
<style>
```

```
body {
```

```
    margin-top: 0px;
```

```
    margin-left: auto;
```

```
    margin-right: auto;
```

```
}
```

```
#mainheader {
```

```
    background-color: #a593c2;
```

```
    font-size: 40px;
```

```
}
```

```
</style>
```

```
</head>
```

Using a Stylesheet

index.html

```
<head>
  <link rel="stylesheet"
        href="styles.css">
</head>
```

styles.css

```
body {
    margin-top: 0px;
}

#mainheader {
    background-color: #a593c2;
}
```

Demo

Styling our text

Adding Images

img tag

- ``
- src is required
- alt is used for alternative text

Demo

Adding a first image

Summary

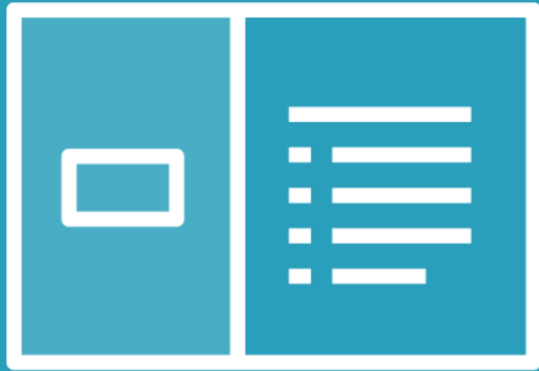

Heading are used to create sections

p is used for paragraphs

Content is often styled using styles
